EXTENZO[®]
Stretch Ceilings

STYLE & TECHNOLOGY

EXTENZO[®] System : an infinity of possibilities

The strength of EXTENZO[®] is due to the originality of its exclusive interlocking system: it can be rapidly installed and rapidly taken down! A complete and multi-use system, EXTENZO[®] comes with over a hundred options - colours and textures - which enable a wide variety of projects: a standard renovation, the creation of a luxury showroom full of light, or the installation of a thermo-dynamic ceiling including ventilation, heating and air-conditioning.

5 families of stretch ceilings

with welded anchor at the edge

- **Translucent**, several grades to create distinct luminous atmospheres
- **Printed**, to create a completely personalized decor
- **Bio-Pruf**, used in food and agriculture, medical, hospital and laboratory contexts, in pharmaceutical industry
- **Perforated**, to improve acoustics
- **Traditional**, with more than 100 colours and 10 textures: satin, lacquered, pastel, suede effect.....Colours on request

Accessories

- **lighting**: spotlights, fibre optic, supports for chandeliers
- **Adjustable Mechanical Ventilation**: ventilation ducts
- **Sound-proofing**: integrated loudspeakers
- **Safety**: smoke detectors, surveillance cameras, sprinklers, safety elements...

EXTENZO[®] can make it all happen

EXTENZO[®] Stretch Ceiling can be installed in moments, occupying the designated space and taking the desired shape. Simply, flexibly, seamlessly and efficiently. The sheeting fixed to the wall or ceiling, can accommodate light fittings, alarms, air conditioning, air vents and any other installations, providing a surface which is perfectly impeccable and uniform.

30 years' experience in Stretch Ceilings

EXTENZO® is the French company most highly committed to the promotion of Stretch Ceilings, the drawing up of quality norms and the development of a strong professional association, able to offer the best guarantees in quality, production, assembly and fitting.

- 1977 | the 1st washable cloth Stretch Ceiling
- 1979 | the 1st heated Stretch Ceiling with air regulation
- 1986 | the 1st Extenzo production unit
- 1987 | the 1st priting ceiling
- 1993 | birth of Extenzo Germany
- 1997 | 2nd Extenzo production unit with Mial-C
- 2001 | succession assured by Jean-Philippe Ruhlmann
- 2002 | birth of Extenzo North America Ltd.
- 2003 | first ISO 9001:2000 certified production unit
- 2003 | installation of the 1st air-conditioning Stretch Ceiling
- 2005 | first ISO 9001:2000 certified production unit
- 2006 | the biggest site ever for Extenzo Stretch Ceilings: 34,000 sq meters
- 2007 | Opening of the showroom and creation of a new European training centre

The company and its values

An independent company based in Alsace, EXTENZO® has undertaken various commitments with the encouragement of Jean-Philippe Ruhlmann and his team: they reflect the company's value, particularly in the field of sustainable development.

- EXTENZO® is a member of "L'Alsace signe l'art et la maniere". This association brings together companies in Alsace which preserve regional skills and integrate the values of sustainable development into their strategy, at the social, economic and environment level. www.alsace-art-maniere.com
- EXTENZO® support the campaign by the Australian Rainforest Foundation for the protection of the tropical rainforest and its important bio diversity. In this context, EXTENZO® has taken part in the purchasing of trees to prevent deforestation
- EXTENZO® cooperates on a regular basis with young designers, who explore freely and creatively with the potential of Stretch Ceilings

Engagement recyclage

Translucent | Daylight

A bright idea to light up your environment

82%, that's Luxury!

Daylight Stretch Ceilings transmit more than 80% of the intensity of the light source: a performance making it possible to create beautiful effects... and save on energy.

Sound and Light Technology

Daylight... integrated light

The ability of EXTENZO® Stretch Ceilings to transmit light makes it possible to create remarkable environments, either by using natural daylight, as in the case of the sky dome, or by using other sources of light whose effects can be controlled: in terms of variation of intensity, colour variation, time control or sequencing. From the level and efficient lighting of a surgery to the techno environment of a bar, Daylight says Light.

- back-lighting of all Stretch Ceilings, whether white or coloured
- integration with partitions, ceilings and any EXTENZO® volume
- adaptable to coffered ceilings, precisely located light sources, and control systems

Bright

Light transmitting ceilings, can create bright spaces by using natural daylight, and as on the case of the sky dome by using other sources of light

Effect

Can vary the feel of the space by using a light source whose effect such as intensity, colour, sequencing, etc can be manipulated

Luminous

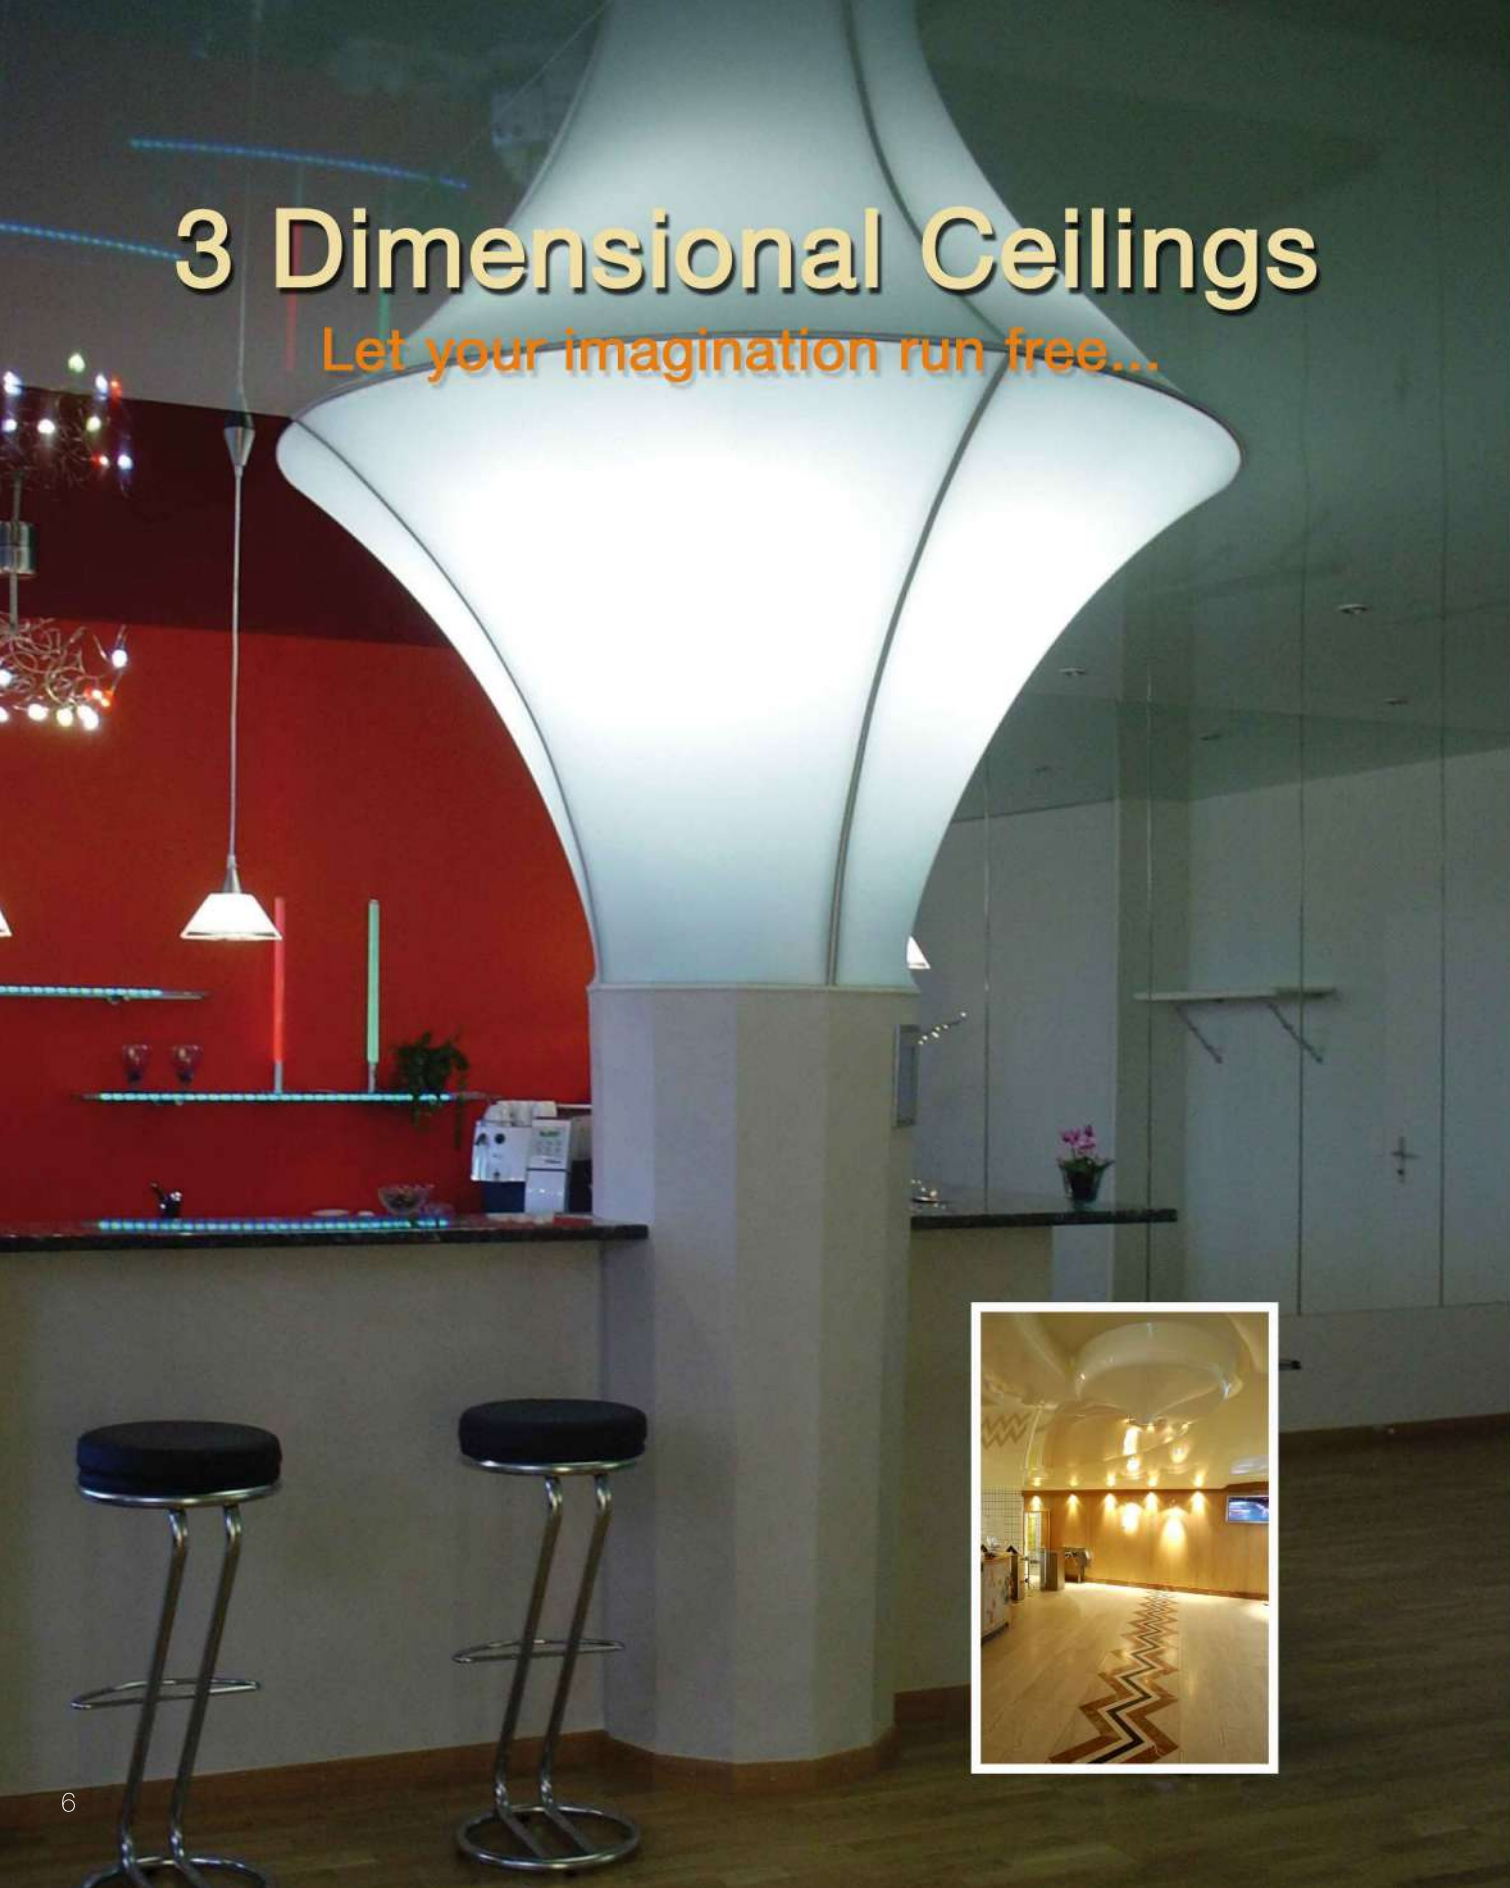

Enables luminous white or coloured walls and ceilings to be created with the new Daylight light variation system.

Daylight Stretch Ceilings transmit more than 80% of the intensity of the light source

3 Dimensional Ceilings

Let your imagination run free...

A project with EXTENZO®: simple, clean and quick

If the Stretch Ceiling earned its spurs in the construction sector, there are good reasons for that: the merits of the system have given Stretch Ceilings an excellent reputation. They are very advanced, are adaptable to many applications, from a simple white renovated ceiling to 3D creations full of light.....at the same time assembly is extremely simple. On site execution is astonishingly fast, and even more so when conditions are clean and dry.

Extenzo® is the first ISO 9001:2000 trademark in stretch ceilings and air-conditioning ceilings

Shape

Extenzo® ceilings adapt to all type of base structures and enable flat or 3D ceilings to be produced with invisible or visible finishes

Volumes

Creation of shapes for unique and original atmospheres (3D)

Reflective

Matt finish creates a neutral, subtle effect while gloss ceilings reflect and make the space appear bigger, adding grandeur and glamour to it.

Art & Design

Unique Creation Stretch Ceiling

From virgin white to flashy fuchsia

An EXTENZO® Stretch Ceiling is the sign of quality architecture. It is also an essential element in interior decoration, providing a wide range of creative possibilities. Dare to bring colour into your house, create calm in the work place, make your sales space dynamic, create a personalized decor, make the heart beat faster....everything is a matter of colour, materials, design, and atmosphere.

Photos, illustrations, graphic, texts, logos, and just about anything can be printed and can take desired from with Extenzo® Stretch Ceiling

Customised

With Extenzo® Art & Design, your ceiling becomes a work of art: it can copy the company logo, photo, illustrations or paintings; all fights of fancy are permitted

Bio-Pruf | Laboratory

Technology and hygiene are of the first Importance

Bio-Pruf, a bacteriastatic and anti fungal solution

When hygiene is a priority, EXTENZO® Bio-Pruf is the solution: specially treated, this dedicated material acts continuously to impede the development of bacteria and moulds, on both surfaces. In accordance with health regulations in force, it is the perfect solution for hospitals, medical laboratories, surgeries, and the pharmaceutical and food industries, clean-rooms, catering services, swimming pools...

EXTENZO® Bio-Pruf Stretch Ceiling is just what is required. In addition to its hygienic properties, aesthetic look and ease of maintenance, it offers possibilities for technical adaptation.

High Pressure Munster

In the Munster valley a cellar in which the famous unpasteurised cheese is aged, cleans its EXTENZO® Stretch Ceiling every week with a high pressure machine, at a distance of 80 cm: after 5 years of such treatment, not the slightest problem!

Vapour Barrier

Ceiling solutions for swimming pools
and humid environments

EXTENZO® multiplies the benefits

EXTENZO® Stretch Ceiling are well suited to steamy environments: it is no surprise that they are widely used in swimming pools, both public and private. They give secure and lasting protection to the structures above, which does not degrade, and maintenance is effortless. In the example, the design is particularly elaborate, with inverted pyramids.

Extenzo® Stretch Ceilings can carry the load due to water damage without breaking and can be returned to its original shape thanks to its form memory

Stop Steam

An effective solution for condensation

No Maintenance

The ceiling will not requires redecorating or repainting

No Cracks

Prevents formation of cracks, flaking of paint and creation of warped areas

Extra Comfort

Improvement in temperature comfort by means of an insulating cushion of air

Climaclick Air Conditioning

Improves sound and thermal characteristic

Heating, ventilation or air conditioning, Climaclick means thermodynamic comfort

Climaclick revolutionises heating, ventilation and air conditioning by gentle and even diffusion of air, whether hot or cold. It never causes draughts. This diffusion process leads to greater comfort with lower energy consumption.

Extenzo® Air-Conditioning Ceilings- lead to energy savings of up to 10% - as per tests by a Japanese laboratory

Comfort

The diffusion process leads to greater comfort with lower energy consumption

No Risk of Draft

With Climaclick, 2/3 of the cooling power is assumed by blowing the air all around the premises at a very low velocity and a temperature close to the temperature of the premises

Quiet

Instead of being concentrated in an aggressive blast, often noisy, the airflow is diffused gently via a long thin peripheral opening
